Nice escape reading that kept me turning pages. It is an interesting view of how an a.i. could be made with out it turning into Skynet.

I enjoyed this book and it was one of those books that I could not put down. The technology and how it was used was fantastic in its depth and bridged the gap between what is currently possible with what may be possible in the not too distant future.

A new look at a subject rooted in Ancient Greece.A possible future I wouldn't mind living in.

Somewhere between a 3 and 4 star book. The ideas in it were good, but it felt a little rushed? Maybe it was just the fast pace, but I did like it enough to finish in one sitting, well one plane ride. Maybe the sequels will more to my liking since book one got the intro's out of the way.I had real mixed feelings for the main character, I liked that he was your average Joe but I didn't like how he was a little hot headed and sometimes too quick to act.All in all I'm giving it a 4 instead 3 mainly because it made me think and had a few interesting concepts.

Just finished the first novel of the Post-Human Series and thoroughly enjoyed myself. David Simpson does a great job of creating an imagianitive world with cyborgs, nanobots, killer robots and artificial intelligence. No spoilers here except, read it if you've not had an opportunity.

compelling and intriguing start to the posthuman series. looking forwaard to future booka

Pretty good book, and looks like a good series, I do want to continue to the next book.

Fantastic vision of a possible future for the human race.
