Advanced Petrophysics: Volume 2: Dispersion, Interfacial Phenomena/Wettability, Capillarity/Capillary Pressure, Relative Permeability

Synopsis

A practical, fast-paced approach to teaching the concepts and problems common in petroleum engineering that will appeal to a wide range of disciplines. Petrophysics is the study of rock properties and their interactions with fluids, including gases, liquid hydrocarbons, and aqueous solutions. This three-volume series from distinguished University of Texas professor Dr. Ekwere J. Peters provides a basic understanding of the physical properties of permeable geologic rocks and the interactions of the various fluids with their interstitial surfaces, with special focus on the transport properties of rocks for single-phase and multiphase flow. Based on Dr. Peters's graduate course that has been taught internationally in corporations and classrooms, the series covers core topics and includes full-color CT and NMR images, graphs, and figures to illustrate practical application of the material. Topics addressed in volume 2 (chapters 5–8) include Dispersion in porous media, Interfacial phenomena and wettability, Capillary pressure, Relative permeability. Advanced Petrophysics features over 140 exercises designed to strengthen learning and extend concepts into practice. Additional information in the appendices covers dimensional analysis and a series of real-world projects that enable the student to apply the principles presented in the text to build a petrophysical model using well logs and core data from a major petroleum-producing province.

Book Information

Paperback: 276 pages

Publisher: Live Oak Book Company (May 15, 2012)

Language: English

ISBN-10: 1936909464

ISBN-13: 978-1936909469

Product Dimensions: 8.5 x 0.6 x 11 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 3 customer reviews

Best Sellers Rank: #583,520 in Books (See Top 100 in Books) #127 in Books > Science & Math > Earth Sciences > Geophysics #802 in Books > Science & Math > Nature & Ecology > Natural Resources #1377 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Environmental

Customer Reviews

Dr. Ekwere J. Peters has over 35 years of petroleum engineering experience in field operations,

petrophysics, higher education, and research. He was the holder of the Frank W Jessen Endowed Professorship and the George H. Fancher, Jr. Endowed Professorship in Petroleum Engineering at the University of Texas at Austin where he was a faculty member for over 31 years. From 1997 to 2001, he was the Chairman of the Department of Petroleum & Geosystems Engineering where he provided administrative and academic leadership to the highly ranked department. At the University of Texas, he taught courses in introduction to the petroleum industry, drilling and well completions, production technology and design, advanced pressure transient analysis, petroleum fluid properties, and advanced petrophysics. He has conducted numerous short courses for the petroleum industry in the United States, Canada, Nigeria, Mexico, Venezuela, Brazil, Japan, Indonesia, Ecuador, and Trinidad & Tobago. A recognized expert in flow through porous media and petrophysics, he has published papers on various aspects of petroleum engineering based on the results of original research. Dr. Peters established a reputation as an excellent teacher early in his academic career and consistently received very high ratings for teaching effectiveness at the University of Texas and at industry short courses. He has won numerous awards for teaching and professional excellence including the prestigious Texas Excellence Teaching Award, the Petroleum Engineering Teaching Excellence Award in the Cockrell School of Engineering, the Society of Petroleum Engineers International Distinguished Achievement Award for Petroleum Engineering Faculty, and the Society of Petroleum Engineers Distinguished Member Award. His previous petroleum industry affiliations were with Shell-BP Petroleum Development Company Ltd (Nigeria) in drilling and well completions; United Petro Laboratories, Calgary as the manager of a PVT and Core Analysis Laboratory and Amoco Production Company, Houston in pressure transient analysis in tight gas sands. Currently, he is a senior consultant at Afren USA, Inc., Woodlands, where he oversees the company's educational initiatives. He holds a BSc, 1st class honors, degree in Engineering from Leicester University, an MS and a PhD in Petroleum Engineering from the University of Alberta, and is a registered professional engineer in Texas.

Great reference book and the labs are on point.

Good book for non experience to mid experience petrophysicist,

I did not read yet, but if follow the same methodology like the volume 1, I can guarantee 100% of satisfied.
