East African Origin Of The Ancient Egyptians

Synopsis

The ancient Egyptians originated in East Africa. Evidence for this can be found in the ancient religious texts of the Egyptians, which describe the people and places in the afterlife. These places coincide with real people and places in East Africa. These real people of East Africa, the Nubians, were considered, in some contexts, demigods by the Egyptians. The ancient Egyptian afterlife paradise was called the Tuat. It was imagined to be a place of lakes and mountains like East Africa. The Egyptians knew these places because they originated in this region and called it Place of the First Time.

Customer Reviews

I have read everything that Mr. Muller has written. in the last 60 days and I have found his work thoughtful and scholarly. Just as the works of Herodotus and Anu Bantu must be in every library at every private and public school. Mr. Muller has systematically taken us through an educational and truthful walk through history to reveal to all, once and for all time who the Egyptians were and where they originally came from. This work is easy to follow an aide to any one who wants to know about real history. I am looking forward to lectures and more books from Mr. Muller and we would be remiss if we did not enthusiastically support his work.

the information I received was really a great help to me, if only other peoples were informed with the knowledge that Africa can offer the.

These books met my expectations -Thanks

grest
