Love And Miss You: The Story Of My Son Michael's Courageous Battle With Brain Cancer

Synopsis

"Michael Patrick Dunlap, my second son, was only twenty years old and attending the Indiana University of Pennsylvania when his life changed forever. These college years should have been some of the best years of his life. Having to worry about cancer should not have been his main concern. His goal was to become a college professor after completing both his master's and PhD programs. This is my son Michael's story. He had hoped to write a book himself, but brain cancer had other plans. I hope to do the story justice with the help of Michael's love and spirit. •Sue Ellen Dunlap In Mike's Words •What a Difference a Year Makes In late November and December, the most skilled team of doctors in the world put my life back together. Because of them, and because of the strength of myself and, most importantly, the people around me, I can now walk down the sidewalks of Indiana without a care in the world, listening to the sweet tunes of Jimmy Eat World and staring at the picturesque world around me. This is the story of how my life unexpectedly unfolded."

Customer Reviews

Sue Ellen Dunlap has taken the experience of dealing with a terminal cancer patient to a new level. If you want to know what it's really like to take care of a terminal patient, particularly a loved one, while dealing with all that life throws at you, you must read this book. It also shows the good side of people and how they come through when a friend is in need. It is an intimate look at how a young man's life changed the lives of hundreds of other people and how even death can inspire others to do more with their own lives. You will not look at life the same way after reading this book. I highly recommend this book.

Michael was the younger of two sons in a loving, active, professional family when cancer struck. He had the best of care and support but finally lost his battle. This book takes the reader through the stages of grief experienced by Michael, his family, and many close friends. There is humor, deep courage, and the sad, raw experience of a young life lost. It's the kind of good book that one wishes never had to be written.

If you have ever been touched by brain cancer this book is a must read. Brain cancers affects so many people young and old everyday. It is a mean and ruthless cancer.

Once I started reading this book I couldn't put it down. Ms. Dunlap has interwoven her own words with the words of her son in a very compelling manner. I found this book to be both sad and inspiring and a very good read. Be prepared to have your eyes opened to what really happens to cancer patients and their friends and families.
