Christopher L. Harbo discovered his love of comic books as an adult when he stumbled on a copy of Stan Sakai's comic "Usagi Yojimbo". Today, Christopher's bookshelves are loaded with comics and graphic novels from around the world. When he's not reading, Christopher enjoys practicing origami, watching Japanese anime, and working in his garden.

I went through this book with my 6 year old daughter and have taught her several patterns, ones which I never knew. I think having the directions in a non-linear loop-dee-loop step by step that doesn't go top to bottom or side to side but down and up and across pages is confusing and foolish for children, but as long as you specify to them to follow the numbers to go from step to step, it will be OK. The planes and the illustrations are clear, just the format of the book is unnecessarily not in traditional left to right or top to bottom sequential presentation of steps.

My 11 year old son is having a good time with this book. He has had no problems making any plane from this book. I recommend it

My 8-year-old nephew LOVES this book! I got it for him for Christmas, and at the end of May he still can't wait to show me his latest masterpiece. He definitely and enthusiastically gives 5 stars!

Got this for my 7 year old son. It has a good variety of planes to choose from, from simple to more complicated. He has spent hours making planes already, and is able to do several of them on his own, so easy to follow instructions.

There are clear step by step diagrams that are easy for my 8 year old son to follow. The airplanes are leveled into 4 sections by difficulty and he only seemed to have trouble around level 3 planes, which was a great opportunity to spend time together.

My 8yo was constantly checking the companion books out from the library when I came across this one from a great price here. Much too my surprise this isn't the companion but all three books in one. He is very happy and I love that this cost 1/4 of the price of buying all three books separately.

I'm a little old for this--but so far its been a good diversion from the usual

A little hard for my six year old grandson, instruction could be a little better.
