Handbook For Health Care Research

Synopsis

Handbook for Health Care Research is included in the 2015 edition of the essential collection of Doody's Core Titles. Doody's Book Review: 98 - 5 Stars! This is a unique book on scientific research written for health care practitioners. Using step-by-step guidelines, the text teaches students and practitioners to implement a research protocol and evaluate the results, even if s/he has no experience or formal training in the research process. It provides the basic tools to carry out and critically analyze the research data, from asking the initial questions to preparing a publication. The chapters are organized around the major steps in the research process, allowing the reader to sort through various research procedures easily. All statistical procedures are illustrated with actual examples from health care practice. Instructor Resources include PowerPoint slides and a Test Bank.

Customer Reviews

Robert L. Chatburn is the clinical research manager, section of respiratory therapy, Cleveland Clinic, Ohio and associate professor of medicine, Lerner College of Medicine of Cleveland Clinic. He is the author of over 200 publications in peer reviewed medical journals and is member of the editorial board of Respiratory Care Journal. --This text refers to an out of print or unavailable edition of this title.

Well written and easy to read. A practical and conclusive guide on everything a clinician needs to

know on how to implement a research study and essentials on writing for publication. The book also clearly explains methods of research and how to interpret research studies. The user friendly book is a vital tool for understanding all research publications and is a "must" for every clinician to own.

Whether you need a refresher or are brand new to research, this text is a very helpful and easy to understand.

Bought the book for school. Was in great condition.

Used it for a class; provides good information on the subject.

Arrived in perfect condition!

Useful for what it is needed for but a little wordy. Overall the information is very useful and a good source.

With this text Mr. Chatburn has graced us with an invaluable resource. Whether you are a seasoned principal investigator or student submitting your 1st abstract, this text will guide you in an intelligent and reasoned fashion through every aspect of the research process. The writing is crisp and concise any information is thoughtfully presented in a way that makes it extremely accessible and useful to the reader. I highly recommend this to any student, scientist or clinician who is thinking about creating a research protocol. This text will guide you from idea to published paper.

As a student with little prior research experience, this book was extremely helpful. This book clearly and concisely walks through the entire process of conducting research, including protocol development, data collection, analysis, and even writing the abstract for publication. Highly recommend this book for health care professionals or anyone interested in conducting research.
