Clinical Neuropsychology: A Pocket Handbook For Assessment

Synopsis

This bestselling, pocket-sized assessment guide has been thoroughly updated to reflect the latest developments in clinical neuropsychology. Designed specifically to meet the needs of neuropsychologists in the early stages of their training, the third edition leads users through the complicated process of assessing, diagnosing, and treating an enormous range of neurologic, neuropsychological, psychiatric, and behavioral disorders and syndromes. New chapters address cultural neuropsychology, somatic disorders, and the relationship between drug abuse and impulse control disorders. Throughout, relevant diagnostic information has been updated to reflect the newest DSM-5 criteria.

Customer Reviews

Provides comprehensive information in a compact, organized, and accessible format that is specifically designed for neuropsychologists in the early stages of their training. --Midwest Book Review
A highly valuable reference in a compact package. --Doody's Review Service
A phenomenal resource. --Cognitive and Behavioral Neurology

Michael W Parsons, Ph.D., ABPP, graduated from the University of Virginia and earned his doctoral degree in clinical psychology from the University of Texas at Austin. He completed an internship at the University of Florida/Shands Medical Center and a postdoctoral fellowship in clinical neuropsychology at the Medical College of Wisconsin (MCW). He has been on the faculty of MCW

briefly before joining the faculty of West Virginia University School of Medicine, where he attained the rank of Associate Professor. During his 7 years at WVU, Dr. Parsons directed the clinical psychology internship program and developed a program for clinical fMRI. He joined the Cleveland Clinic in 2007, serving as Staff in the Section of Neuropsychology with appointments in the Center for Behavioral Health and the Burkhardt Brain Tumor Center. Thomas Alan Hammeke, PhD, ABPP, graduated summa cum laude from Fort Hays State University and attained his doctoral degree in clinical psychology from the University of South Dakota. He completed an internship at the Clement J. Zablocki VAMC in Milwaukee and subsequently a postdoctoral fellowship in clinical neuropsychology at the Medical College of Wisconsin (MCW). He was Professor and Director of the Department of Neurology at the MCW for 25 years before he transitioned to the Department of Psychiatry and Behavioral Medicine at MCW in 2010 and became the lead neuropsychologist for the Polytrauma Program at Zablocki VAMC and the preceptor for a postdoctoral residency program in clinical neuropsychology. He was honored with the Distinguished Neuropsychologist Award from the American Academy of Clinical Neuropsychology in 2013.

Love earlier versions. This is fantastic content but whoever "produced" the book used bad glue or binding, within a month pages started falling out. replaced the book but the other book did the same thing. I carried the 2nd edition with me through the Army, in my purse, in backpack, no problems. This one I'm afraid to touch and it's expensive!!!!

This book achieves its stated purpose very well. I'd recommend it to other neurologists who want to understand clinical Neuropsychology better. The chapter on the neurobehavioral examination is directly applicable to neurologists' practice.

I had the first edition from about 1998, and "upgraded" to the third edition. New editors and expanded content, and still an excellent resource with much information packed in to a small package.

keeping this with me all the time at work.

This version of the book covers more areas than the prior editions, but there is less practical information in each chapter compared to the two prior versions.

Excellent reference text, updated from previous edition. Gives a good overview of major concepts, disorders, assessment issues, user friendly, readable.

Excellent quality service price

Informative and helpful guide to have in your library.
