The reader can easily read about groups of related diseases as well as groups of related therapies. The level of complexity of the book is such that it has practical applications on a daily basis but can also be used by the resident as a teaching tool and as a handy source of review for the boards. In addition, it can be used by the practicing dermatologist to study for recertification. The scope of the book is immunology, immunogenetics, immunopathology and immunopharmacology as they relate to clinical dermatology.
