Customer Reviews

DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years.

I love this map! I call it my grid map. It is very easy to use, I use mine every time even if I am only going 50 miles and typically would take a major highway. I have found some beautiful scenes along

the way and it may only add a couple minutes to the trip. I bought this map for my daughter's family, they like to explore. You learn much more from one of these maps than from a GPS. You get to see where you are in connection to say a major highway. The map will allow you to chose many alternate routes. You never know what you might see just around the corner. There are wonderful county roads throughout MN, but if you only use freeways or four lane highways, you never get to really experience our beautiful state.

For starters, 's price of \$14.99 was \$5 less than the book is sold for in retail stores. We used the maps to explore the Superior shore north of Duluth and found them to be complete and accurate. Numbered Interstate exits are very helpful as are the numbered campgrounds, recreation areas and other features. One note of caution: Not all the green areas are state/national lands. This differs from the Delorme Michigan Atlas. I've had the Michigan book for several years and use it often. It's has held up well with no loose pages. This book seems to be of similar good quality.

I discovered after buying this that there is a newer edition, but this one is still reasonably up to date. This purchase replaces an older one that I used all the time. A truly valuable reference for topography, rivers, lakes, and roads.

The original GPS that doesn't rely on electronic GPS units to work. I believe Delorme makes these maps for every state and they've been so helpful in the past that I wouldn't hesitate to buy updated versions when necessary.

I use it to locate public hunting areas in S MN. I replaced my old copy of the Atlas and Gazetteer which had faithfully shown most of the State WMA's and Federal WPA's, but didn't include many of the public hunting areas I'd found traveling the back roads. I had expected the new issue to show more of the current public hunting areas than the old, but the reverse was true. The new Gazetteer had even fewer areas shown, many of which had been present in the old edition. Anyhow, not throwing away the old one!

My neighbor has an outdated gazzateer and I was impressed with it so I ordered one. Having one of my own has been great for finding new fishing spots. I've ordered 2 more to hand out to fishing buddy's so they can guide me now. A must have in the fishing arsenal

If you ever want to get into the great MN outdoors, this is the map for you. It's state wide, topo, has all the lake accesses, all the roads to get you to and from your adventures. Wouldn't go anywhere without this. Might just get another one for the second vehicle.

Dad was very pleased with his new acquisition
