Customer Reviews

I bought this to put in my teenage daughter's Easter basket. I hadn't seen these before and since she enjoys adult coloring books, I thought why not adult dot-to-dots as well? Let's face it, teenage Easter baskets are not easy to fill.If you are not familiar with these extreme dot-to-dots, let me tell you, they ARE extreme. This book contains 42 different connect-the-dots, and some of them have numbers that go up in the thousands. The numbers are quite small and some are printed lighter so if you have trouble reading fine print, these may be hard to see. I suggest using a ruler or straightedge for precise lines and doing it in PENCIL. The first one, my daughter tried to do with gel pens. She wanted certain parts of the structure in specific colors, but she messed up. The next number isn't always where you might expect it to be. She quickly learned that a fine mechanical pencil (she uses

a .5 mm) works best. The paper in this book is a nice, heavy weight, not quite cardstock, but definitely thicker than your average puzzle book or plain paper. It also has perforated pages so you can easily remove them. The back of each page has a few clues for the next famous place. Some you can tell by the position of the numbers, but some you can't. There is an "answer key" in the back of the book showing each dot-to-dot completed so you can choose what place you want to do if you don't want to be surprised. These are a lot of fun and provide a good distraction for relaxing or stress relief. Like any good puzzle, they are great for relieving boredom, a common symptom of the technology overloaded teen. My daughter is enjoying this pastime and anything that keeps her "unplugged" is a win in my book.

Absolutely loved it! So much fun and lots of time spent on just one page. It has a bit of pages but because it has a lot of dots to connect on one page u wont be done in a matter of days like u might think. Im loving this purchase!

Very detailed and makes you look for the number. I have to use cheap reading glasses. But these pictures make me feel like I really did something. I cannot do one page in a day. I had a stroke and it affected my short term memory. I didn't think this would help but it has. It helps me when I get nervous or depressed I get one of my books out and it gets me back to feeling better.

What a wonderful, challenging dot-to-dot book! The pictures are so detailed it is amazing they are dot-to-dots! The only tiny setback is every once in awhile it is hard to decide which dot goes with which number, but that is remedied when the second line comes along & you can see which is which. Love this book!

Best dot to dot book out there. They are hard and challenging. Wish this author would make more dot to dot books. You'll love this challenge. People complain of the lighter numbers but they help so you dont mix up the numbers that are so close. Also anyone who thinks the numbers are to close then your not ready for an adult dot to dot because this book is the true meaning of an adult dot to dot. Have fun

Love this book! Definitely one of my top extreme dot-to-dot books so far! The numbers can get very close but after a couple puzzles you can start to see the pattern and the closeness of the numbers doesn't matter. Love how when the numbers are close they change the shades so you can see

them better. I do all mine in permanent ultra fine tip markers but recommend pencil to anyone new until they get used to the patterns. Only issue I have is that the puzzles can start getting repetitive but that is understandable since most are buildings

The numbers are extremely small. There are also a few instances where one number will be on the right side of the page and the other will be on the left side. I should have been forewarned when it recommended using a ruler. I would also recommend only attempting these on pencil. I did not have a problem seeing the numbers but if you are elderly or need glasses you will definitely get frustrated. Overall despite the issues, I have still enjoyed it.

I switch from reading to these all the time.
