Christiane Northrup, M.D., is also the author of the #1 New York Times bestseller *The Wisdom of Menopause* and *Mother-Daughter Wisdom*, and the host of seven public television specials. A board-certified OB/GYN and past president of the American Holistic Medical Association with more than twenty years of clinical and medical teaching experience, Dr. Northrup was a pioneer in the partnership between conventional and complementary medicine. Her work has been featured on *The Oprah Winfrey Show*, *Today*, and *Good Morning America*, among many others. She lives in Maine and is the mother of two adult daughters.

I ordered this book for a course I am taking, and am so glad that I know it exists! I spent last year looking for a book just like this, but didn't know where to find it. Christiane Northrup explains the mind-body connection, using women's real-life stories and science in a way that is clear to understand. This book is empowering and enlightening for any woman, giving women the permission and strength to take our health into our own hands. I honestly think that every woman should own a copy of this book! Packed with great info, it makes you excited to be your healthiest self!

Dr. Northrup's books are very thorough and complete, and I find them great to have as reference books which I turn to often over the years. I have this (bought a newer edition to replace my old, well-worn one) and her book on menopause. I have bought this book as a gift as well. She writes like she sounds on TV - very clear, easy to understand, insightful, detailed without being too complex. It's an easy read with personal stories and examples of the conditions, symptoms and solutions she discusses.

This is one of my favorite books, the type of book I can't put down. Lots of information on how to be healthy, happy, and in tune with one's femininity.

This is a fantastic book because the author is an MD but she also has a very holistic mind/ body approach to selfcare and medical care. I have read her books and reread them for years just to review her statements concerning how much stress level and mental/emotional health relate to

physical health.

My therapist recommended this book to me and i was very surprised when it arrived and was about 900 pages. I have not read it completely as at the moment I have no use for the chapters on pregnancy and menopause, though I do plan to read the pregnancy chapters soon and will add to this review. I would have given the book 5 stars but there were a few things that I didn't really like. This book is very interesting, the author is a gynecologist but talks about a lot of things I would assume traditional Western gynecologists don't speak to their patients about, such as how our menstrual cycles align with the lunar cycle and a great deal of Eastern medical ideas. My therapist recommended it mainly because I have gynecological issues and the book talks a lot about accepting our cycles as a normal part of our female lives. It also contains a great deal of useful information on everything from the various parts of your cycle, gynecological problems, PMS, hormone imbalances and everything else in between. There is a great deal of information on female sexuality and anatomy as well. Overall, I think this is a great book and almost a reference manual that every woman should at least read, if not own.

Christiane Northrup presents a wonderful combination of practical advice from a highly skilled medical doctor, and considerable wisdom and open mindedness with respect to how we take care of ourselves as women. I gave this book to both of my young adult daughters and have a copy myself. This is a fantastic resource to have in your library.

If I had Dr. Northrup as my physician I would have been healthy in mind, body and soul a long time ago. I believe she has probably forgotten more than most, so called, "doctors" know. Dr. Northrup educates, in depth and incredible scope, her knowledge of healing which is not limited to Western medicine. I currently have, from a teaching hospital/facility, mind you, an internist, cardiologist, genetics/endocrinologist...and probably a few others that I forgot. Know what? In nine months of health care they have collectively done nothing to heal me; they have failed to diagnose me; in short, they have been a waste of time and money...which I am beginning to believe is the POINT of how so called Western medicine is structured. After all, if we are healed, then we will not need to spend money on doctors and expensive drugs will we? Reading this book has been the most sobering experience of my life. Dr. Northrup also has a wicked sense of humor, which comes out delightfully in the most unexpected places. Every woman, and man, should read this book. And the book is extensively researched with many, many websites and other doctors' information as

addendums. Read this book. Then think about the medical care you have received all your life. I guarantee you that this book will save many, many lives; improve the quality of many lives; and educate America on the difference between the "doctor mills" and true healing and well-being. IF YOU BUY ONLY ONE BOOK THIS YEAR...BUY THIS ONE.

Great a gift for every woman.
