This book gives you every strategy you need to play good tennis and includes strategies on playing the game and strategies for preparing for the game. It starts out with mental and nutritional strategies and proceeds to holding the racket, different shots, serving, volleying, doubles playing and ends with different exercises and training ideas that will make your game better. These mental strategies should help you to prepare for the game. They include visualizing the ball and seeing in your mind's eye how you want to play. It stresses focusing on your goal and making that goal attainable so you do not become discouraged. The book discusses distractions and how you can avoid them so you keep your concentration on the game. It stresses being optimistic so that you concentrate on positive aspects of your game rather than the negative ones. It also teaches you to face fear and rejection and how to develop good habits when playing tennis. There is so much to this chapter it would take too much room to explain it. The book explains why you want to eat carbs, protein and even fat for energy. It explains what foods to eat and what to stay away from in preparation for a game. It stresses getting enough sleep and avoiding caffeine. There is even a list of good foods. Now for the game. The grip on the racket is discussed in detail from why it is important to how you hold the racket. It explains the different types of grips you can use in the game. It discusses the forehand shot and backhand shot in easy steps. The book explains the serve and the volley and how to master them in detailed steps. Playing doubles and what you should and should not do is presented. That is a lot of information but there is even more about workouts that will help your game with specific exercises, and suggestions for if you are injured and have to recover before playing again. The book explains everything about tennis.
